WARE MALCOMB ANNOUNCES CONSTRUCTION COMPLETE AT EMERSON PROCESS MANAGEMENT OFFICES

IRVINE, Calif. (June 8, 2015) – Ware Malcomb, an award-winning international design firm, today announced that construction is complete on the 50,000 square foot renovation of the office and laboratory of Emerson Process Management located at 2400 Barranca Parkway in Irvine, Calif. Ware Malcomb provided interior design and graphic design services for the project.

Emerson Process Management, an Emerson business, is a leader in helping businesses automate their production, processing and distribution in the chemical, oil and gas, refining, pulp and paper, power, water and wastewater treatment, mining and metals, food and beverage, life sciences and other industries. Ware Malcomb’s design for the company included a simple yet diverse finish palette, the sharing of natural light, white surfaces with bright colorful accents, mosaic wall tiles, interior glass walls, an area for social communication and collaboration, huddle rooms for impromptu meetings, flexible training rooms, and branded walls designed to showcase and communicate evolving branding and corporate culture. The design team incorporated graphics such as quotes, client history, molecular structure graphic designs, and imagery from the various industry markets into their branding designs. Additionally, acrylic and metallic materials give the completed space a clean, new, and precise feel to reflect the innovative technological accomplishments of the company.

“Our primary goal for the renovation was to update Emerson Process Management’s workplace both aesthetically and functionally,” said Ted Heisler, Principal, Interior Architecture & Design. “At the same time, it was important for us to create a collaborative and brand-rich working environment that would motivate and inspire its talented employees.”

KPRS Construction Services, Inc. served as General Contractor for the project.
