WARE MALCOMB MOVES TO NEW LARGER OFFICE SPACE IN BROADWAY STATION

DENVER (July 16, 2020) – Ware Malcomb, an award-winning international design firm, today announced it has moved its Denver operations into a new larger office space located in Broadway Station at 900 S Broadway, Suite 320 in Denver. The new office will be the firm's second largest in North America, providing architecture, planning, interior design, civil engineering, branding and building measurement services to clients in a wide range of industries.

The move accommodates Ware Malcomb's growing client and employee base in the region, as well as the growth of the firm's Denver-based civil engineering practice. Ware Malcomb opened its first Denver office in 2001 and has been operating a second Denver office for its civil engineering operations since 2016. All services will now be based out of the new Denver office location at Broadway Station.

"By bringing our leading architecture, interior design and civil engineering services under one roof, we will be able to reap the maximum synergies of this incredible team in both client service and project management," said Matt Chaiken, Principal of Ware Malcomb's Denver office.

"We are so proud of our civil engineering team's growth and evolution over the past several years," said Chris Strawn, Principal, Civil Engineering. "This new office will continue to provide a strong base to continue expanding Ware Malcomb's civil engineering services in markets across North America," added Tom Jansen, Principal, Civil Engineering.

Ware Malcomb's new Denver office incorporates the latest in interior design trends, as well as the firm's own design standards. Ware Malcomb has also implemented the firm's own Healthy Workplace Assessment protocols in the new office design, including occupancy density, distancing and interaction plans, signage and messaging, and other cleaning and wellness standards. "We are following the COVID-19 pandemic closely, and we look forward to bringing our employees back into the new office slowly, safely and in strict compliance with all local and state guidelines," added Chaiken.

The entry to each Ware Malcomb office conveys a hospitality feel, providing an open and inviting welcome punctuated with iconic pieces of furniture. The color palette, finishes and materials reflect the Ware Malcomb brand colors of vibrant orange with white and grey accents. The work environment fosters collaboration while also allowing for privacy and heads down work when needed. It includes desking stations with adjustable desk heights to provide a variety of work options and cater to every individual's work preference.

In addition to implementing the firm's design standards across its offices in North America, Ware Malcomb's in-house branding studio also incorporates a unique design flair in each regional office that reflects the local community and surrounding area, as well as the office's client base.

Ware Malcomb serves as the Landlord Architect for Broadway Station, a transit-oriented, mixed-use infill development that serves as a gateway to downtown Denver, the Central Business District as well as the Denver Tech Center.

Ware Malcomb has completed over 2,000 projects across the state of Colorado for clients including Prologis, Hines, Xfinity, TruStile and Karcher, among many others.
